

# Bicycles

Bicycles are made in lots of colours and sizes. However, all \_\_\_\_\_<sup>(1)</sup> have the same basic parts. They have \_\_\_\_\_<sup>(2)</sup> wheels, two pedals, a \_\_\_\_\_<sup>(3)</sup>, handlebars and brakes.

Bicycles need to be looked after. They should be \_\_\_\_\_<sup>(4)</sup> and have \_\_\_\_\_<sup>(5)</sup> put in the tyres. All parts should be checked to see if they are working \_\_\_\_\_<sup>(6)</sup>.

Everyone should \_\_\_\_\_<sup>(7)</sup> a safety helmet when riding a bicycle. A helmet

helps to protect your \_\_\_\_\_<sup>(8)</sup> if you fall off.

Remember to ride on the correct side of the \_\_\_\_\_<sup>(9)</sup> and to ride in \_\_\_\_\_<sup>(10)</sup> file.
